60/423,985 6 November 2002 (06.11.2002) US
- (71) Applicant (*for all designated States except US*): **BURCON NUTRASCIENCE (MB) CORP.** [CA/CA]; 1388 Waller Avenue, Winnipeg, Manitoba R3T 1P9 (CA).
- (72) Inventors; and
- (75) Inventors/Applicants (*for US only*): **GREEN, Brent, E.** [CA/CA]; 586 Rathgar Avenue, Winnipeg, Manitoba R3L 1G4 (CA). **XU, Lei** [CA/CA]; Apt. 116-981 Gulf Place, Ottawa, Ontario K1K 3X9 (CA). **MILANOVA, Radka** [CA/CA]; 605-1749 Robson Street, Vancouver, British Columbia V6G 1E1 (CA). **SEGALL, Kevin, I.** [CA/CA]; 805 Ash Street, Winnipeg, Manitoba R3N 0R7 (CA).
- (74) Agent: **STEWART, Michael, I.**; Sim & McBurney, 6th Floor, 330 University Avenue, Toronto, Ontario M5G 1R7 (CA).
- (81) Designated States (*national*): AE, AG, AL, AM, AT, AU, AZ, BA, BB, BG, BR, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EC, EE, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KR, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NI, NO, NZ, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW.
- (84) Designated States (*regional*): ARIPO patent (GH, GM, KE, LS, MW, MZ, SD, SL, SZ, TZ, UG, ZM, ZW), Eurasian patent (AM, AZ, BY, KG, KZ, MD, RU, TJ, TM), European patent (AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IT, LU, MC, NL, PT, RO, SE, SI, SK, TR), OAPI patent (BF, BJ, CF, CG, CI, CM, GA, GN, GQ, GW, ML, MR, NE, SN, TD, TG).
- Published:**  
— *with international search report*  
— *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments*
- (88) Date of publication of the international search report:  
21 May 2004
- For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.*

(54) Title: COLOUR REDUCTION IN CANOLA PROTEIN ISOLATE

(57) Abstract: In the recovery of canola protein isolates from canola oil seeds steps are taken to inhibit the formation of colouring components and to reduce the presence of materials tending to form colouring components, to obtain a lighter and less yellow canola protein isolate.

WO 2004/000032 A3

# INTERNATIONAL SEARCH REPORT

Application No  
PCT/ 03/00934

## A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 A23J1/14 A23J3/14 A23L1/27 A23L1/277

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 A23J A23L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, FSTA, WPI Data, BIOSIS

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
P,X	WO 02 089597 A (BURCON NUTRASCIENCE MB CORP ;BARKER LARRY D (CA); MURRAY E DONALD) 14 November 2002 (2002-11-14) page 8, paragraphs 3-5; claims 1-12	26
Y	US 6 005 076 A (MURRAY EDWARD D) 21 December 1999 (1999-12-21) cited in the application column 5, paragraph 3; claims 1-51; examples 1-4	14-64
Y	US 5 844 086 A (MURRAY EDWARD DONALD) 1 December 1998 (1998-12-01) cited in the application the whole document	14-64

☒ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

### \* Special categories of cited documents :

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*&\* document member of the same patent family

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/CA 03/00934

## Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☒ Claims Nos.: 1-13  
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:  
see FURTHER INFORMATION sheet PCT/ISA/210
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☒ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

### Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☒ No protest accompanied the payment of additional search fees.

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 14-58,62-64

A process of preparing a canola protein isolate from canola oil seed meal, which comprises the following steps:

- (a) extracting the canola oil seed meal to cause solubilisation of the protein;
- (b) separating the aqueous protein solution;
- (c) increasing the protein concentration while maintaining the ionic strength by use of a selective membrane technique to provide a concentrated protein solution;
- (d) diluting into chilled water to cause the formation of discrete micelles;
- (e) settling the micelles to form a protein micellar mass;
- (f) recovering the micellar mass from the supernatant, wherein one or more of the following colour reduction steps take place:
  - extraction of the protein using an aqueous salt solution containing an anti-oxidant (step (a));
  - washing the canola oil seed meal with an alcohol (before step (a));
  - subjecting the concentrated protein solution to diafiltration (after step (c));
  - extracting dried canola protein isolate with an aqueous alcoholic solution (after step (f));
  - inactivate myrosinases contained in the oil seeds (before step (a)).

2. Claims: 59-61

A process of preparing a canola protein isolate from canola oil seed meal, which comprises step (a) to (f) and between (c) and (d) a pasteurisation of the concentrated protein solution to form a pasteurised protein solution.

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 1-13

Present claims 1-13 relate to a method defined by reference to a desirable characteristic or property, namely a process "which results in a canola protein isolate having a decreased colour".

The claims cover all methods having this characteristic or property, whereas the application provides support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT for only a very limited number of such methods. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible.

Independent of the above reasoning, the claims also lack clarity (Article 6 PCT). An attempt is made to define the method by reference to a result to be achieved. Again, this lack of clarity in the present case is such as to render a meaningful search over the whole of the claimed scope impossible. Consequently, the search has been carried out for those parts of the claims which appear to be clear, supported and disclosed, namely those parts relating to the subject-matter of claims 14-64:

A process for preparing a canola protein isolate from canola oil seed meal, which comprises process steps (a) to (f), wherein one or more of the following colour reduction steps take place:

- extraction of the protein using an aqueous salt solution containing an anti-oxidant (step (a));
- wash the oil seed meal with an alcohol (before step (a));
- diafiltration of the concentrated protein solution (after step (c));
- extraction of the dried protein isolate with aqueous alcoholic solution (after step (f));
- inactivation of myrosinases in the oil seeds (before step (a)).

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
